RE: Independent Cleanup Pathway Report Kenton Foundry (Former) and Adjoining Railroad Spur (Former) Properties (ECSE #5758)

Dear Dan and Dave,

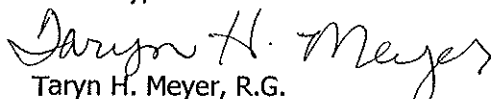

This letter transmits the Independent Cleanup Pathway Report for the Kenton Foundry (Former) and Adjoining Railroad Spur (Former) Properties for your review and approval. The City has completed investigation, remediation, and redevelopment of the site.

Information in this report demonstrates that residual contaminant concentrations in site soils do not pose an unacceptable risk to human health or the environment; significant groundwater contamination is not present at the site; and the site does not represent a potential significant current or future source of contamination to the Willamette River.

Once you have had the opportunity to review this report, the City requests issuance of a Source Control Decision and a No Further Action determination for the site from the Oregon Department of Environmental Quality Cleanup Program.

Please feel free to call me at (503)823-5861, if you have any questions or need additional information.

Sincerely,

Taryn H. Meyer, R.G.
